

## *Developed in cooperation with Shipping Agents worldwide*

The GAT-Ship Operation and Quality Program is a well-proven planning, management and documentation program. It is created and developed especially for Ship Agents in order to economize, standardize and systematize all port call routines.

The GAT-Ship Operation Program is designed to meet international standards

### *Port Call System*

As a customer you get:

- Configuration of GAT-Ship system with document templates and tariffs
- Training of Super-User
- 24/7 Support

The Program reduces time-consuming, office work to a practical minimum by reducing paperwork and by implementing standardized computer procedures. Information is entered only once, for use in various documents and emails. Document handlings therefore become easier and far more reliable. At management level, the system includes an overview of statistics and business activities.
